

CYCLOTRONS 1975

The following list of cyclotrons is an excerpt of a detailed report which was compiled by F.T. Howard from Oak Ridge for the 7th International Cyclotron Conference in Zürich. It lists 74 facilities with isochronous (AVF) and 14 facilities with frequency modulated (FM) cyclotrons. At least 18 countries now have cyclotron projects in operation or in progress.

The detailed cyclotron list may be obtained from:
